Program 10

Installation of Kalilinux

Aim

To install Kalilinux

Algorithm:

1. **Download** the Kali Linux ISO file from the official website.
2. **Create a bootable USB** using Rufus, or use the ISO in VirtualBox/VMware.
3. **Start the computer/VM** and boot Kali Linux from the USB/ISO.
4. **Select "Graphical Install"** from the Kali Linux menu.
5. **Select language, location, keyboard, username, and password.**
6. **Select disk partitioning** and allow Kali Linux to install the required files.
7. **Install the bootloader and restart** the system. Remove the USB if used and log in to Kali Linux.

Output:
